## **MALDEN / PINE CITY RECONSTRUCTION 2020**

### **RECONNECTION TO EXISTING SEPTIC SYSTEMS**

#### **STEP I. EXISTING RECORDS**

Contact Whitman County Public Health to determine if your property has existing septic records for your property. Obtain a copy of these records if available.

#### **STEP II. SYSTEM ASSESSMENT**

If there are no existing septic permits or records for the system at your property, OR if the existing permit is greater than 10 years old, a system assessment is required. Contact a Whitman County Licensed Evaluator to schedule a system assessment. In order to reconnect to an existing system, the assessment of the system must be "Satisfactory."

#### **STEP III. SITE PLAN**

Using the existing records (if any) and the system assessment, draw a site plan that includes the location of septic system and proposed reconstruction buildings, driveways, and all critical setbacks.

#### **STEP III. RECONNECTION APPROVAL**

Once all above steps are completed and submitted to Whitman County Public Health, the documents will be reviewed for approval. There will be no fees associated with the reconnection, repair, or new installations of septic systems in Malden/Pine City.

**Non-Satisfactory Assessment:** If System Assessment determines system is failing or corrective action needed, Whitman County Health Department will contact you to discuss your options and next steps.

**Fees:** All Whitman County septic permitting fees related to the reconstruction of Malden/Pine City will be waived. Fees accrued by any Septic Professionals for installation or assessments are determined by the professional and are not regulated by the County.
